

All SPECTRAL EVOLUTION Spectroradiometers come with our exclusive DARWin SP Data Acquisition Package– an easy-to-use menu driven software program designed to analyze spectral irradiance, radiance, reflectance, transmittance, absorbance and more....

The exclusive DARWin SP Data Acquisition Module included with each unit allows for full featured instrument control and data handling. (A) The SR-1901PT Spectroradiometer equipped with 1.2m fiber optic and right angle cosine diffuser was used to analyze the performance of a commercial pulsed solar simulator as per AM1.5. In (B) the SR-1900 was used to classify a continuous solar simulator to IEC60904-9/ASTM E927-05. The DARWin SP Data Acquisition software contains sub-routines to analyze class performance and create spectral match reports. Pull-down menus for CIE color space are also available.

(C) The full range SR-3500 was used to measure outdoor solar radiance using a 4° lens foreoptic and white reflectance plate. Pull down menus allow for easy calculation of integrated energy measurement. (D, E) Even our entry level SR-500 Spectroradiometer comes with all necessary subroutines to generate high quality solar spectra. The figures below demonstrate the radiometric analysis of a commercial solar simulator taken at a customer site. All SPECTRAL EVOLUTION Spectroradiometers are lightweight and easy to carry anywhere.

# Full Range Spectroradiometers UV-VIS-NIR-SWIR

**Fast, full featured and flexible!**  
All SR Series Spectroradiometers feature NIST-traceable calibration and automatic dark current shutter control for easy one-touch spectral radiance & irradiance measurements.

# Meet our entire lineup of fast, full featured, and flexible laboratory spectroradiometers

- Full range UV/VIS/NIR/SWIR measurements with just one scan—no hassling with multiple spectroradiometers
- No moving gratings or internal fiber optics to break or jam
- No fuss autoexposure control; - thanks to 7 decades of dynamic range response
- Fast, accurate one-touch scans—autoscaling & auto dark current shutter
- Easy to set up anywhere—compact, lightweight, single-box design
- DARWin SP Data Acquisition software captures spectra in ASCII format for use with third party software—no post-processing required
